BENEFITS OF IMEP/HIMS

Manage

- Offers automatic replenishment base on Min-Max rules adjust with seasonality factors to keep the right level off inventory on hand: enough to meet your needs but not too much to create waste
- Alerts about inventory that expires or will expire to streamline the utilization of the appropriate lots to avoid waste
- Shares inventory across locations during backorder,
- shortage situations or anytime
- Inventory carrying costs to create more efficient operations allowing funds to be reallocated to services that benefit hospital or patients
- Optimizes annual inventory spend by better understanding your inventory levels and inventory utilization needs

Track

- Manages inventory levels across multiple hospital locations. Gain a corporate-level view for the hospital or the supplier
- Generates purchase orders electronically to reduce process time and costs
- Full traceability of the product from the receipt into your location to the consumption
- Full traceability of each user operations
- The utilization by instruments, the performance of your inventory versus the tests performed

Report and alert

- Dashboard-driven reports
- Reacts to trends in product or instruments usage throughout your network

Integrate

- Interfaces with suppliers, HIS and any instrument to support streamlined workflows
- Consolidates management of inventory information in one source

ADVANTAGES

Web-based
- Allows a quick implementation across multiple hospitals
- Create unlimited access points
- Supports multi-location and multi-site use, allowing any actor to benefit from one single, unique and accurate stock and replenishment situation

Device Independent
- Tracks in type of product regardless of storage location
- Integrates with existing automation equipment and software
- Allows you to add new hospitals and users as you grow
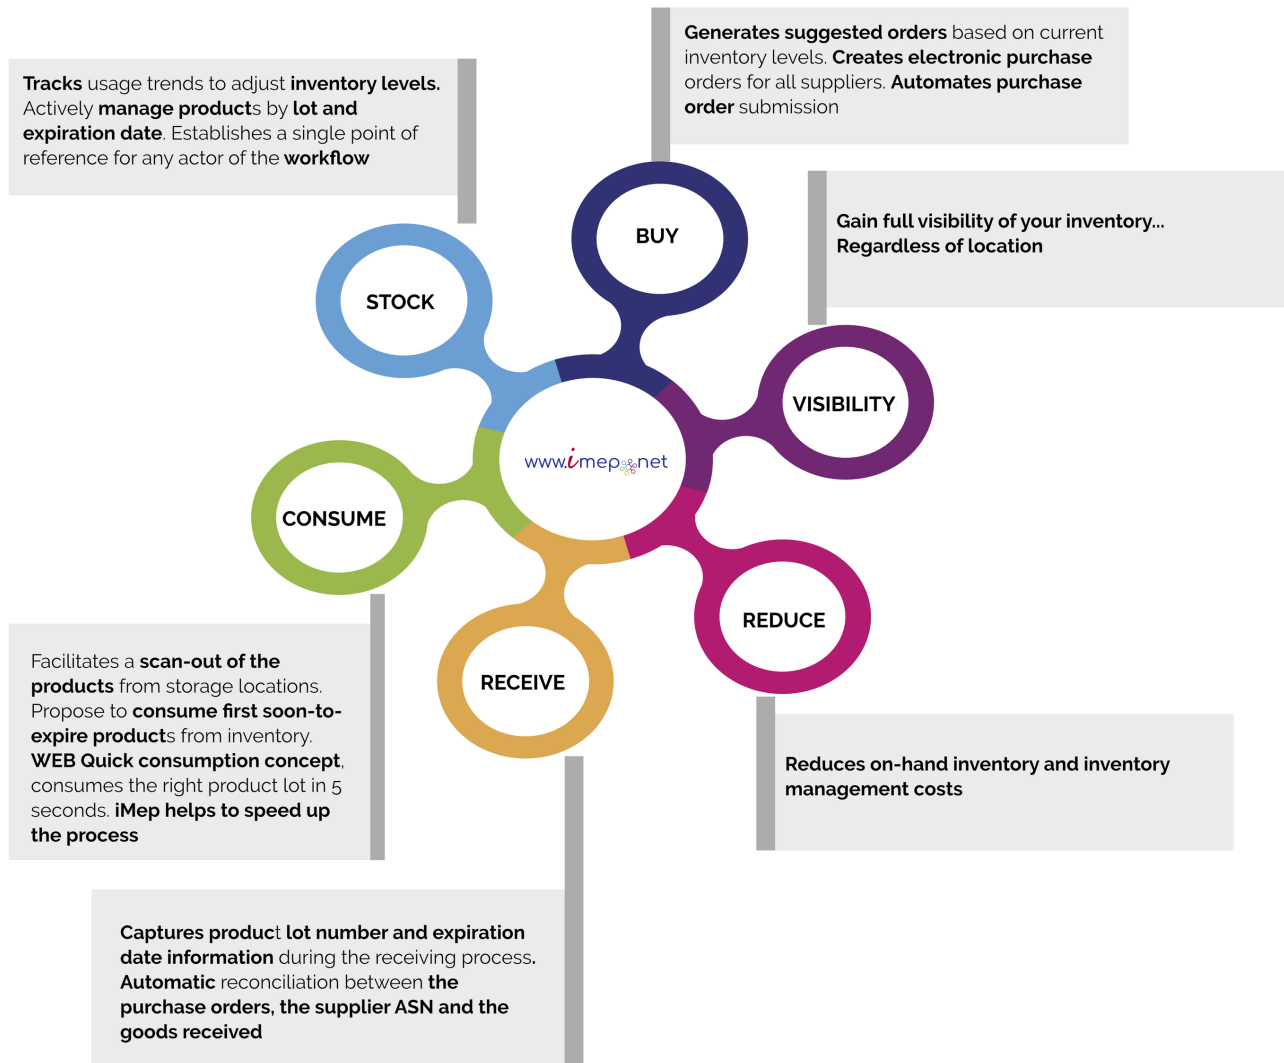

Dashboard Reporting
- Facilitates faster analysis of data
- Promotes efficient data gathering and reporting
- Provides opportunities for continuous process improvement
