About Our Company

MCR solutions is an international provider and developer of business solutions for small, mid-sized, big and multinational corporations.

Our headquarters are based in Lausanne, Switzerland and our International Operations are based in Barcelona, Spain.

Our Company Growth

For more than 20 years we have been implementing Oracle projects for large corporations worldwide. We are known for being able to deliver successful projects in complex, mission-critical, multinational environments.

We realized that small and mid-sized companies usually struggle with business challenges similar to those of large corporations, but with far less resources. That's why we recently expanded our business to provide smaller companies with solutions tailored to their needs and make them enjoy the same level of expertise large corporations do.
